Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 4, 10 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Waltensphul et al. Waltensphul et al teaches a sliding closing element (20) including a mobile slide plate (24) driven by means of a drive (30) comprising a driving rod (32) and a push rod (27) with a connection between the driving rod and push rod formed by a coupling (40) with two coupling parts including a coupling head (43) and a coupling claw (41, 42) in a u-shaped configuration and including support surfaces which could support a wedge shoe (which is all that is required by instant claim 4 rather than actually requiring a wedge shoe to be present), and where the coupling connects the rods without any “play”, thereby showing all aspects of the above claims.

Allowable Subject Matter

Claims 2, 3 and 5-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims since none of the cited or applied prior art shows or fairly suggests the use of the recited couplings in conjunction with a wedge shoe.

Art Unit: 1742

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tofuku et al is also cited as a further example of prior art sliding gate valve couplings.
